California Plant Rescue (CaPR) member institutions make conservation collections of seeds and living plants to secure high levels of genetic diversity in off-site collections, such as botanic gardens and seed banks, to safeguard wild populations in a time of uncertainty. We also gather information about wild populations to ensure that baseline of information is available for future generations.

CONSERVATION SEED BANKING

- **747** CNPS 1B plants represented in CaPR seed banks as of 2020
- **149** New kinds of CNPS 1B plants brought into CaPR seed banks in 2020
- **71** CNPS 2 and 4 plants represented in CaPR seed banks as of 2020

BUILDING CAPACITY • STRENGTHENING COLLABORATIONS

- **6 New Staff**
  CA Biodiv funding facilitated the addition of new staff positions at CaPR institutions
- **3 New Germination Chambers**
  CaPR institutions purchased germination chambers for seed viability testing, a key component to conservation seed banking
- **Diverse Partnerships**
  CaPR collaborates with organizations in the state, federal, and nonprofit sectors to achieve our conservation goals

CaPR Seed Banking Progress

- **End of 2018** 345 spp
- **Start of CaPR**
- **End of 2019** 598 spp
- **End of 2020** 747 spp
EXECUTIVE SUMMARY

In 2020, CaPR members tripled their annual rate of seed collecting and added 149 new rare plant species (California Rare Plant Rank [CRPR]1B) to conservation seed banks, despite the challenges of a global pandemic and a record-breaking wildfire season. We are now 64% of the way to the goal of seed banking 1,166 CRPR1B rare plants by 2025. We also expanded institutional capacity to secure California’s plant diversity by adding six new staff members; purchasing valuable infrastructure equipment such as germination chambers, cryopreservation tanks, and generators for backup power; and obtaining supplies like seed sieves and drying chambers. CaPR members also shared information about our work at more than 20 events with state and federal agencies, the scientific community and the general public. California Biodiversity Initiative funds allowed CaPR members not only to increase the number of rare plants represented in seed banks, but also to expand the geographic scope of our work. In 2020, CaPR collections ranged from Mount Shasta to San Diego, and from the Central Coast to Death Valley.

GOALS

The long-term goal of CaPR is to secure the entire California flora in conservation collections, with an emphasis on seed collections. In the near term, we are focusing on protecting the most vulnerable plants first. In 2018, the State of California launched the California Biodiversity Initiative, providing a roadmap for protecting the state’s natural heritage. In 2019, the state legislature provided funding for conservation seed collections, with the express goal of leveraging the accomplishments and infrastructure of CaPR members to ramp up seed banking efforts across California. The ambitious goal set forth by the California Biodiversity Initiative is to seed bank or otherwise conserve all of California’s rarest plants by 2025, and we are well on our way to meeting that goal.

Conservation collections of both seeds and living plants, stored in seed banks and living collections at botanic gardens, provide the raw materials for the enhancement, restoration and reintroduction of wild plant populations, while also providing an insurance policy against extinction. As we advance the long-term conservation of these rare plants, we also increase our understanding of their biology and ecology via field observations, germination testing and propagation. Thus, our seed banking efforts not only provide for long-term storage of invaluable genetic material, but also feed directly into comprehensive strategies for plant conservation and recovery.

MEMBER INSTITUTIONS
California Botanic Garden
California Native Plant Society
Center for Plant Conservation
Mojave Desert Land Trust
Regional Parks Botanic Garden
Santa Barbara Botanic Garden
San Diego Botanic Garden
San Diego Zoo Wildlife Alliance
Theodore Payne Foundation
UC Botanical Garden at Berkeley
UC Davis Arboretum and Public Garden
UC Santa Cruz Arboretum & Botanic Garden
